next™ 16

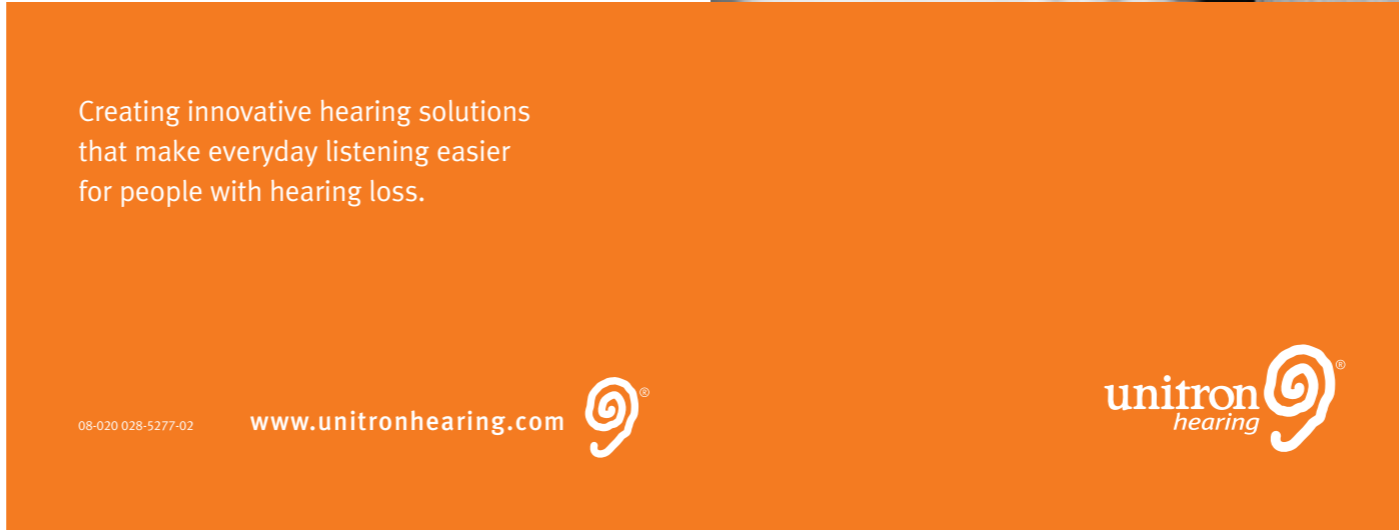

*From the private times  
to the stories of a lifetime.*

Congratulations! You've just taken your first step towards better hearing. Your listening needs are as unique as your journey through life. That's why the Next™ step you take is an important one.

Next greatly enhances your listening experience by providing an exceptional set of **purpose-driven innovations** that are designed to address your most challenging listening needs, no matter where you are. Next is built on the world's most advanced digital sound processor. It simply sounds better.

**Wherever life takes you. Next™.**

Creating innovative hearing solutions that make everyday listening easier for people with hearing loss.

hearing

The Next series is comprised of four outstanding hearing instrument lines. Each Next hearing instrument offers unique features to address your individual preferences and budget, and is suitable for mild to severe hearing loss.

# →16

## Next 16 takes your active life everywhere you want to go

Distinguishing features include:

- Comfort-Clarity Balance
- AutoPro3™ automatic program
- Adaptive directional microphone
- Speech enhancement
- MyMusic™
- AntiShock™
- Wind noise manager
- 3 manual programs
- Optional Smart Control remote
- Noise reduction
- Feedback management system

### Easy listening in busy places

Background sounds distract you from group conversations.

**Adaptive directional microphone** – lets you focus on conversations as it manages background noises, even if in motion (such as a moving car). As your listening environment changes, Next 16 automatically engages the most effective microphone setting to keep you connected to what you want to hear.

### Appreciate music

It's hard to enjoy the music when the sound is not clear.

**MyMusic** – a dedicated setting that increases the clarity of each note to enhance your overall listening experience and appreciation of your favorite music.

### Make discreet adjustments

You want to modify your hearing instrument's settings with ease.

**Smart Control** – this optional remote control enables you to adjust your Comfort-Clarity Balance and other listening preferences at the touch of a button. It's very discreet and exceptionally convenient.

### Take control of the moment

Background noise is unavoidable in social environments.

**Comfort-Clarity Balance** – provides you with convenient control to boost the clarity of speech or reduce the distraction of noise as each moment demands.

### Experience the convenience of superior automatic

You have distinct listening needs in different situations.

**AutoPro3** – an automatic program with optimized settings for three distinct listening environments: quiet, noise only and speech plus noise. As you move between various situations, autoPro3 seamlessly transitions to ensure the most comfortable listening experience.

## Setting the standard

Next 16 offers a great set of purpose-driven features including **noise reduction** and the most sophisticated **feedback management system**. Next comes in a wide range of styles and colors from ultra-small behind the ear (BTE) to discreet completely in the canal (CIC). Let your hearing health care professional help you select the style that's right for you.
