hearing

From the minutes at a time to the moments of a lifetime.

Congratulations! You've just taken your first step towards better hearing. Your listening needs are as unique as your journey through life. That's why the Next™ step you take is an important one.

Wherever life takes you. Next™.

Enjoy your favorite activities

Your listening needs vary throughout the day.

4 manual programs – enables you to manually choose up to four customized programs to match your listening activity, whether a phone conversation, having dinner with your family, listening to the radio in your car, or watching television.

Engage in group conversation

Background sounds distract you from group conversations.

Fixed directional microphone – lets you focus on conversation and other sounds directly in front of you while reducing continuous background noises behind you.

Hear every word

Soft spoken voices are often the hardest to hear.

Speech enhancement – identifies and amplifies soft speech to improve the clarity of sound and ease of listening without having to adjust the volume.

Make discreet adjustments

You want to modify your hearing instrument's settings with ease.

Smart Control – this optional remote control enables you to adjust your listening preferences at the touch of a button. It's very discreet and exceptionally convenient.

Setting the standard with purpose-driven features

Next 4 offers a great set of purpose-driven features including **noise reduction** and the most sophisticated **feedback management system**. It is built on the world's most advanced digital sound processor. Next simply sounds better.

Next has the right style for you.

Your hearing healthcare professional will help you select a style that's right for you. Choose from a wide range of colors and options.
